

# Materials Recycling Guide

## Recycling Resources

Use these resources to explore recycling opportunities for GAF roofing material waste from your job site. All resources are nationwide, except where noted.

### Polyisocyanurate Insulation Board (Mechanically Attached or Ballasted)

- [Nationwide Foam Recycling](#)
- [Repurposed Materials](#)

### PVC or TPO Membranes (Mechanically Attached or Ballasted)

- [AP&J Recycling \(Alabama, Arizona, Texas\)](#)
- [Construction & Demolition Recycling Association](#)
- [Nationwide Foam Recycling](#)
- [Repurposed Materials](#)
- [SD Polymers \(Southeast U.S.\)](#)

## Additional notes

- Polyiso: Broken, wet, or contaminated sheets are not recyclable and must be discarded.
- PVC/TPO: Only mechanically attached or ballasted membranes are eligible for recycling.
- Membranes must be clean and prepared according to the specifications of the recycler.
- Contact the specific recycler to determine how to prepare materials.
- Recycling programs and availability may vary by region and condition of material.
- This guide is for educational purposes only. Anyone wishing to recycle material must contact the associated vendors to get the most up-to-date information.

## GAF Recycling by the Numbers

# 80%

Waste diversion goal across our manufacturing facilities by 2030.

# 75%

Nine of our plants have achieved at least 75% waste diversion rate.

# 85,000

Tons of material recycled or reused across all GAF manufacturing facilities (2021).

## Recycled Content<sup>1</sup>

# 4-5%

EverGuard® TPO

# 1-7%

EverGuard® PVC

# 13-41%

EnergyGuard™ Polyiso Insulation

<sup>1</sup>All amounts are third-party GreenCircle Certified.
