

# Low-VOC TPO Spray Adhesive

## **GAF** EverGuard® TPO **QuickSpray** Adhesive LV50

### Description:

EverGuard® TPO Quick Spray Adhesive LV50 is a low-VOC sprayable, solvent-based contact adhesive useful for bonding smooth EverGuard® and EverGuard Extreme® TPO membranes to various substrates.

### Features and Benefits:

- Faster installation than traditional bonding adhesive
- High initial tack
- 20, 45, and 90 square sizes are available in refillable canisters
- 2 year shelf life from the date of manufacture

### Application:

- Substrate should be dry, clean, and free from oil, grease, and other contaminants
- For TPO Membrane, spraying from 8"– 12" (203 – 305 mm) away, apply adhesive uniformly to both the substrate and the underside of the membrane
- Allow adhesive to dry to a tacky feel before bonding membrane to substrate
- Apply at an ambient temperature of 20°F (-6.7°C) and above. The cylinders must be kept above 50°F (10°C) for the product to spray properly. Utilize power-heated blankets and hot boxes when necessary. Ensure that cylinder temperatures stay below 150°F (65.6°C).
- Apply pressure with a push broom or weighted roller to ensure complete bonding
- To clean Hose & Gun Kit, attach hose and gun to EverGuard® Quick Spray LV50 Cleaning Kit and run cleaner through hose and gun for approximately 10–15 seconds. Each cleaner canister should get approximately 9–10 cleanings for the 10 square size.
- If used as a primer for SA Vapor Retarder, apply to the substrate only
